## 1 Drum Spill Deck – SDD1

**Item Number:** SDD1

**Item Name:** 1 drum Spill Deck

**Sump capacity:** 43 ltr/package

Spills happen no matter how hard you try to avoid them. Forklifts knock over drums, tanks are punctured and transporters leak and drip. It is important to have the right equipment on-hand when these spills occur to eliminate the slip-and-fall hazard. A quick response is the first order of business — and your best weapon — in the fight against spills.

Containing spills properly makes the clean up process so much easier and minimises damage to the environment. While it is a vital goal, good Spill Containment is not just about protecting the environment. Proper Spill Containment is also about minimising harm to personal safety by reducing the incidence of dangerous liquid spills.

A Spill Deck is an innovative product to be used to store any liquid storage drums / cans to avoid spills, leaks or other discharges of hazardous wastes and comply with regulations.

### 1 Drum Spill deck Features

- Holds up to 1 x 205L drums
- 100% recyclable polyethylene construction
- Non-skid removable deck
- Compatible with most forklifts
- Quadri-directional forklift operation
- Sump capacity of 43 L
- Dimensions of 680mm (H) x 680mm (W) x 150mm (Depth)
- Static Load capacity 680 kg Uniformly Distributed load
- Dynamic Load Capacity 300kg
- Hexagonal drain plug facilitates drainage
